COMMERCIAL LAUNDRY SOLUTIONS

Introducing

Commercial laundry solutions designed to clean with efficiency.

Efficiency is critical in the commercial laundry business. Getting it clean the first time, without the need for recleans, requires a precise combination of premium products, water quality, cycle time, mechanical action, and temperature to meet the unique challenges of your operation.

FLEX Commercial Laundry Solutions provides innovative products with optimum cleaning power, supported by fully trained technical service personnel. You can count on consistency, peak results, and reduced operational costs.

**FLEX POWDERED DETERGENTS ARE ALSO AVAILABLE
IN "FLEX PAX" FOR A FAST AND CONVENIENT
PRODUCT ADDITION TO EACH LAUNDRY LOAD!**

Experience a custom clean.

OPTIMUM CLEANING PERFORMANCE

- Whiter whites, brighter brights
- Prevents yellowing and graying
- Effective stain removal in the wheel
- No residual odor from soils or products

SUPPORTED BY EXPERT SERVICE

- Trained and trusted technical service representatives who will design a customized laundry solution that performs the best for your unique challenges
- Highest quality dispensing systems installed for efficiency, performance, and process protection

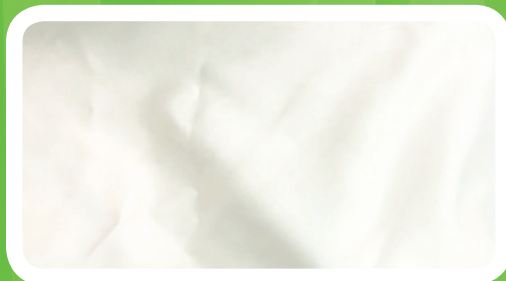

OPERATIONAL EFFICIENCY

- Minimal recleans for savings on chemicals, labor, and utilities
- Cycle time, water usage, and temperature optimization ensure proper cleaning and energy conservation
- Gentle on fibers for maximum fabric life and reduced product replacement

*Spotting and spray bottles provided free of charge with product purchase.

STAIN REMOVERS

Although most soils and stains are efficiently removed in the wheel with FLEX customized laundry solutions, laundry operations usually encounter some difficult stains that will require pre-treatment for full removal. FLEX offers a complete line of stain removal products that have been specifically designed for use in commercial laundry operations.

These advanced products offer powerful stain removal action to remove most wet-side, dry-side, or combination stains that will be encountered, helping to ensure maximum fabric life. They are easy to use, and after application to the stain they can be fully rinsed in the laundry process. Safe on most fabrics and dyes, these products protect your investment!

"We were given a huge project to launder the towels, washcloths and blankets from the dorms of the largest university in the state of Tennessee. It was summertime and the items were filthy. Many were stained with mold and mildew as well as suntan solutions. Unfortunately, the first time we cleaned these items we did not have FLEX products. A majority of the items needed to be recleaned and it was unlikely the stains could be removed. Our FLEX representative installed the FLEX products and put together a reclaim program in order to save the items.

The FLEX products were a major advancement over the previous products we were using. We were able to recover 90% of the linens that we thought were unsalvageable! This saved the University a lot of money. Now, I can confidently go after this type of business in the future. I just wish we would have used FLEX products the first time to avoid the time and labor cost of reruns."

-CHRIS MYNETT, OWNER, HALLS CLEANERS

COMPREHENSIVE SITE EVALUATION & CUSTOMIZED MULTI-PRODUCT COMBINATIONS.

Our Laundry Specialists welcome the opportunity to provide a thorough site survey/evaluation. Through an in-depth analysis of your operation including water quality, soil make-up, supply and energy demands, unique cleaning challenges and overall fabric condition, they will provide thorough fabric care process recommendations and on-site training based on best practices.

Whether it be healthcare facilities, hotels, health clubs, educational institutions or food and event services, we specialize in customizing a multi-product combination of advanced laundry solutions with high-quality dispensing

solutions designed to work with intelligence. A customized reference chart with recommended formulas for various fabrics will be provided to help ensure optimal wash performance.

Additionally, our unique FLEX color-coded product labeling system was designed with both simplicity and safety in mind; product lines are easy to identify for accurate, convenient re-orders without risk of chemical cross contamination.

PREMIUM PUMP SOLUTIONS.

We are pleased to provide dispensing solutions from Brightwell Dispensers, the most reliable, easy-to-use and top-of-the-line models on the market today. Our laundry dosing solutions include full planning, design, installation, reporting and maintenance service based on your budget, usage and wash requirements. Various dispensing options can be provided according to your

process needs to eliminate product misuse and waste. In addition, the reporting function allows you to monitor usage efficiency, helping you to control costs and improve sustainability while maintaining the integrity of the fabric.

Example: On-premise laundry dosing system, 4 pumps (double pump head)

WITH OUR COMPLETE PACKAGE OF FLEX COMMERCIAL LAUNDRY SOLUTIONS, CUSTOMIZED FORMULAS AND AUTO DOSING, YOU BENEFIT FROM A FIRST-RATE LAUNDRY WASH EXPERIENCE WITH SUPERIOR WASH RESULTS, SIGNIFICANT SAVINGS AND CUSTOMER SATISFACTION.

BRIGHTWELL
REVOLUTIONARY DISPENSING SOLUTIONS

"Thanks to the FLEX Laundry system we have improved the quality of our products and the efficiency in our cleaning process. We are able to save all newly stained linens and recover old linens that were written off as a loss. The colors of our linens are brighter, and they are cleaned after only one wash with no pretreating, scrubbing or overuse of chemicals.

We are quite happy with the professional service and knowledgeable staff working with us to solve our problems, saving us time and money, which in turn saves our clients' money by allowing us to lower our cleaning costs. We would recommend them to anyone looking to increase productivity and efficiency while decreasing business costs and labor."
