

BacStop™

RESIDUAL SELF-SANITIZING BACTERIOSTATIC FINISH

SAFE & EFFECTIVE CLEANING CHEMISTRY

PRODUCT TYPE:

BacStop™ is an EPA registered, laundry textile sanitizer with self-sanitizing, residual anti-microbial activity.

PRODUCT FEATURES:

- Reduces bacterial count by minimum 99.9%
- Kills odor-causing bacteria and sanitizes fabric
- Effective against Staph & Strep
- Remains active throughout the textile use-cycle

EPA Registration Number: 7048-8-94200

PRODUCT PERFORMANCE:

BacStop™ is an EPA registered, ready-to-use liquid laundry sanitizer. When used in the final rinse, BacStop™ leaves behind a finish that is both self-sanitizing and bacteriostatic. BacStop™ laundry sanitizer continues to eliminate more than 99.9% of infectious bacteria that is acquired in use. Unlike bleach – which stops working after textiles are removed from the wash-wheel – **BacStop™ remains active on textile surface with a residual, self-sanitizing coating**, continuing to aid in the prevention of cross-contamination from both Gram Negative bacteria (ie. Klebsiella pneumonia) and Gram Positive bacteria (ie. Staph – a major cause of hospital acquired (nosocomial) and Community Acquired infections), providing protection throughout the use cycle of the uniforms, linens and other textiles.

APPLICATIONS:

Health Care, Nursing Homes, Institutional, Schools, Athletic Teams, Hotels/Motels, Military, Correctional

COMPLIMENTARY SITE EVALUATION

For specific product details and usage instructions, please contact your local Street's sales representative who can provide a thorough site evaluation to recommend the best program to meet your operational needs.

A PRODUCT OF

COMMERCIAL LAUNDRY SOLUTIONS

Healthcare Textile Treatment

It has long been known that the use of an EPA registered textile sanitizer with residual, self-sanitizing capabilities will create a ZONE OF INHIBITION on the surface of the fabric. This will kill 99.9% (at minimum) of newly acquired bacteria. Using a product like this, in addition to good and hygienic laundering practices, will insure that you are not only getting clean textiles out of the dryer but that you are significantly reducing the incidence of cross-contamination for patients, visitors and employees, during the use cycle of these textiles.

BacStop™ USE INSTRUCTIONS

For professional/industrial use only. Before using any chemical product, review the Safety Data Sheet (SDS) and original product label for safe handling and proper disposal.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

USE RATE

**2¼ oz
per cwt**

BACTERIAL CONTROL

At this use level, BacStop™ sanitizes and imparts to the fabric a residual self-sanitizing and residual bacteriostatic finish under humid or wet contamination conditions (ie. Diapers and bed linens of incontinent persons) during normal conditions of use and storage. This activity has been confirmed against *Klebsiella pneumoniae*. ATCC No. 4352 and *Staphylococcus aureus* ATCC No. 6538.

BacStop™ is used in the final, warm rinse cycle at a low water level. Dilute the appropriate amount of BacStop™ in one gallon of water; then add to the wash in the final rinse, or dispense directly through automatic dispensing equipment. Repeat as necessary. BacStop™ will not harm fabrics.

DO NOT USE IN THE PRESENCE OF, OR MIX WITH OTHER CHEMICALS!

How to Order BacStop

BacStop is sold by authorized Street's distributors in 5-gallon (8.92 L), 15-gallon (56.78 L), and 55-gallon (208.2 L) containers.
