

Sanitizing Fabric Softener™

RESIDUAL BACTERIOSTAT & SELF-SANITIZER

17

PRODUCT TYPE:

Sanitizing Fabric Softener™ is a concentrated quaternary fabric softener that softens fabrics and acts as a residual bacteriostat and self-sanitizer for prevention of odor-causing organisms.

PRODUCT FEATURES:

- Fabric Softener Concentrate
- Residual Bacteriostatic
- Residual Self-Sanitizer
- Safe for use on a variety of fabrics, including athletic apparel, uniforms, bedding, towels, hospital and institutional linen.
- Reduces odor causing bacteria from wet contamination

EPA Registration Number: 1839-107-94200

PRODUCT PERFORMANCE:

Sanitizing Fabric Softener™ is an EPA registered liquid fabric softener and sanitizer formulated specifically for hospitals, nursing homes, schools, and other institutions where sanitization is of prime importance in controlling the hazard of cross contamination. When used as directed, Sanitizing Fabric Softener softens and sanitizes fabrics, such as athletic apparel, uniforms, diapers, table linens, bedding & towels, and hospital and institutional linen. It also reduces odor-causing bacteria under conditions of high relative humidity or wet contamination.

COMPLIMENTARY SITE EVALUATION

A PRODUCT OF

Sanitizing Fabric Softener™ USE INSTRUCTIONS

Before using any chemical product, review the Safety Data Sheet (SDS) and original product label for safe handling and proper disposal.

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product is designed for use in household laundry applications by addition to the final rinse cycle at a water temperature range of 68-100°F (20-38°C) and full water capacity of 8-10 gallons for front loading washing machines and 12-15 gallons for top loading washing machines, and 5 minute treatment time.

The residual self-sanitizing activity reduces the number of odor causing bacteria from wet contamination.

Residual self-sanitizing level of bacterial control

Add this product to the final rinse cycle for residual self-sanitization activity at the following dose:

Top Loading Washing Machines: 2.5 fl. ozs. per wash load. (2 fl. ozs. per 10 lbs. of dry laundry)

Front-Loading Washing Machines: 1.7 fl. ozs. per wash load. (2 fl. ozs. per 10 lbs. of dry laundry)

At this rate, this product provides, to the fabric, a residual self-sanitizing activity against odor-causing Gram positive and Gram negative organisms under conditions of high relative humidity or wet contamination.

Residual bacteriostatic level of bacterial control

Add this product to the final rinse cycle for residual bacteriostatic activity at the following dose:

Top Loading Washing Machines: 10 fl. ozs. per wash load. (8 fl. ozs. per 10 lbs. of dry laundry)

Front Loading Washing Machines: 6.7 fl. ozs. per wash load. (8 fl. ozs. per 10 lbs. of dry laundry)

At this rate, this product provides, to the fabric, a residual bacteriostatic activity against odorcausing Gram positive and Gram negative organisms under conditions of high relative humidity or wet contamination.

This product inhibits the growth of organisms which act on urine to produce ammonia in diapers and wet bed linens. It also softens clothes, thereby eliminating chafing and "static cling" from nylons and other synthetic fabrics. The use of this product will also help to improve ironing time.

How to Order Sanitizing Fabric Softener

Sanitizing Fabric Softener is sold by authorized Street's distributors in 5-gallon (8.92 L), 15-gallon (56.78 L), and 55-gallon (208.2 L) containers.
